Filter Type		Captrate Solo Filter or Standard Baffle			
Number of Filters	1	2	2	3	4
Decibels		71 dB @ 790 CFM			
Hood Weight	125 lbs.	135 lbs.	155 lbs.	175 lbs.	195 lbs.

Suggested Specifications

1. Application Constraints:

Ensure the application is within the specified constraints of the hood. **NOTE: Only for use with residential appliances.**

2. Location:

Ensure the location you are installing the hood meets proper clearances.

3. Electrical Specifications:

Specify electrical requirements when ordering the hood if other than noted above.

4. Filters:

Failure to use specified filters will void warranty. See filters listed above.

5. HVAC Loads:

Heat generated by the electric appliance must be included in HVAC load calculations.

6. Applications:

Hood may be installed to cover residential appliances only.

Optional Straight Wrapper

Optional Decorative Wrapper
